# Tristan Oshier

## Junior Software Engineer

317-697-1411     Tristan.oshier2000@gmail.com     Indianapolis, Indiana

## About

I am currently a full-stack JavaScript developer seeking a position in Web Development/Software Development that will challenge me and further my coding skills. I enjoy problem-solving, creative thinking, and am very adaptable to any team environment. Throughout past educational and work experiences, I have met strict project deadlines, developed unique floor plans, and have worked in many different team environments. All of these experiences have prepared me for a multitude of situations I will face on the job in the tech world.

## Technical Skills

**Languages:** JavaScript/TypeScript, HTML, CSS

**Libraries & Frameworks:** React.js, Express

**Backend Skills:** Node.js, PostgreSQL, Heroku, Firebase, SQL

**Tools:** Git/GitHub, Postman

## Projects

**– MyRecords Full CRUD React App –**
https://to-myrecords-client.herokuapp.com/
Record collection application for vinyl collectors. React.js, Node.js, PostgreSQL, Heroku.

**– Mars Weather API –**
https://to-mars-weather-api.web.app/
